ARTIST

ref. 1605

La massue « Artist » pour les écoles

Cette massue est conçue pour être utilisée dans les écoles aussi bien par les petits nouveaux artistes que par les plus grands voir même les adultes qui désirent tester la jonglerie.

La massue « Artist » est réparable facilement puisque l'on peut changer le top, le knob et la poignée soit même. Son équilibre et sa forme (long manche et petit corps comme les « Twist ») donnent une rotation lente et surtout une très grande facilité à jongler en passing. Sa résistance aux chocs est due à la souplesse de tous ses composants

The « Artist » club for schools

This club is conceived to be used in schools as well by the small new artists as by the bigger even by the adults who wish to test juggling.

The « Artist » club is easily repairable because one can change the top, the knob and the handle himself. Its balance and its shape (long handgrip and small body as the "Twist") give a slow rotation and especially a very big ease to juggle passing. Its resistance in the shocks is due to the flexibility of all its components

Die « Artist » Keule für die Schulen

Diese Keule ist gefasst, um in den Schulen genauogut von den neuen kleinen Künstlern benutzt zu werden, wie von den Größern, sogar von den Erwachsenen, die wünschen, das Jonglieren zu testen.

Die « Artist » Keule ist leicht zu reparieren, weil man selbst die Top, den Knob und den Griff wechseln kann. Ihr Gleichgewicht und Ihr Körperform (langer Handgriff und kleiner Körper wie die "Twist") geben eine langsame Umdrehung und vor allem eine sehr große Leichtigkeit, daher passing zu jonglieren. Ihr Widerstandsfähigkeit in den Schocks ist der Geschmeidigkeit aller seiner Bestandteile verdankt.

SOFT'N SAFE - SAS

ref. 1600

170 gr	450 mm	36 units

To begin club juggling safely - soft handle.

Pour débuter en confort - manche mou.

Die gefahrlosen Keulen für Anfänger - weicher Griff

DIABOLOS STICKS AND SPARE PARTS

DIABOLO STICK **ENERGY** GENERATION DIABOLOGY

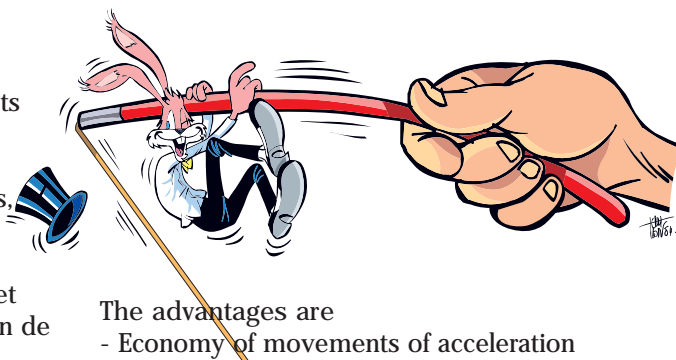

Cool ! As in the pole vault, in intensive use, the stick multiplies the acceleration and the diabolo reaches very quickly its maximal rotation.

Génial, comme au saut à la perche, en utilisation intensive la baguette démultiplie l'accélération et le diabolo atteint très rapidement sa rotation maximum.

Genial, wie im Stabhochsprung, in der intensiven Benützung, untersetzt das Stäbchen die Beschleunigung und das Diabolo erreicht seine maximale Umdrehung sehr schnell.

Les avantages sont :

- Economie de mouvements d'accélération
- Evite les traumatismes articulaires et musculaires, les chocs sont amortis par la baguette.
- La baguette reste rigide et précise lors de l'exécution de figures hors accélération.

The advantages are

- Economy of movements of acceleration
- Avoid the articular and muscular traumatism, the shocks are absorbed by the stick
- The stick remains stiff and precise during the execution of tricks save acceleration.

Die Vorteile sind:

- Sparsamkeit von Beschleunigungsbewegungen.
- Vermeide die Gelenk und Muskelverletzungen, die Schocks sind vom Stäbchen abgeschwächt.
- Das Stäbchen bleibt während der Erfüllung von Figuren außer Beschleunigung steif und genau.

NEW MISTER BABACHE TOP SYSTEM

Les avantages sont :

- La ficelle est libre, elle ne s'entortille plus
- Economie de ficelle, la fixation est en haut de la baguette
- Avec les figures « lâchés de baguettes » l'extrémité se détériore et coupe la ficelle. Maintenant on ne change plus de baguette mais seulement le capuchon

The advantages are

- Economy of thread, the fastening is in the top of the stick
- With figures "throwing of sticks" the extremity deteriorates and cuts the thread. Now we don't change the stick anymore, but only the top

Die Vorteile sind:

- Die Schnur ist frei, sie schlingt nicht herum
- Sparsamkeit von Schnur, das Festmachen ist oben auf dem Stäbchen.
- Mit heftigen Aufschlägen verschlechtert sich die Hülse und schneidet die Schnur. Jetzt ändert man nicht mehr das ganze Stäbchen, sondern nur die Ersatzhülse.
